Case 3:20-cv-00451-CEA-DCP Document 375 Filed 03/28/24 Page 1 of 5 PageID #: 16989

Universal Product and run by the Listed Extreme Universal Product only when the user enables the Switch Engine (EXOS) persona on that product.

Each Listed Extreme Product that previously shipped or ships to a customer contains one Version in binary form. By this Stipulation, Extreme represents that each particular Version in binary form includes the binary form of every line of source code originating from SNMP Research (*i.e.*, lines in those files including the SNMP Research copyright notice) that is included in that particular Version's source code. For example, without limitation, EXOS Version 11.2.1 is one of multiple Versions that previously shipped or ships to customers in binary form with the X450 Listed Extreme Product, and by this Stipulation, Extreme represents that EXOS Version 11.2.1 in binary form includes the binary form of every line of source code originating from SNMP Research (*i.e.*, lines in those files including the SNMP Research copyright notice) that is included in the source code for EXOS Version 11.2.1.

By entering into this stipulation, SNMP Research agrees that it will not demand production of Extreme's build environment for the products mentioned in this stipulation, including any build tools or build files, in the instant litigation for any purpose whatsoever.

This stipulation is made in connection with the instant litigation only.

¹ During the process of compiling and linking EXOS Versions, k_ and v_ files are generated using a SNMP tool. Extreme has produced the k_ and v_ files that were generated during the compilation and linking of Version EXOS 32.4.1.10 on the source code computer ("Generated Files"). Files or files that are substantially similar to the Generated Files are generated during the process of compiling and linking of EXOS Versions listed in Exhibit A. The definition of Version for EXOS Versions includes the Generated Files.
